# **Brownsville Independent School District MISSION STATEMENT**

The mission of the Brownsville Independent School District, an international community respected for its rich cultural heritage is to produce responsible, well-rounded graduates

who

- have the ability to pursue a post-secondary education and/or career
- possess a capability for independent learning and thinking with a competitive edge in a multi-cultural, multi-lingual world

by

- identifying and maximizing physical, financial, and human resources and
- unifying community and school commitment to excellence in education and equal educational opportunity.

# **Brownsville Independent School District BELIEF STATEMENT**

- Excellence is our common goal.
- Parental responsibility is an integral factor in student success.
- Belief in self is fundamental to success.
- Everyone deserves respect as a human being.
- Perseverance and hard work are essential for success.
- Change creates opportunities for growth.
- Truthfulness is important for effective communication.
- Public schools are an extension of the community.
- Sensitivity is essential for understanding the needs of others.
- Great achievements follow high expectations.
- Cooperation is necessary to get things done.
- Active listening is essential for effective communication.
- Successful students are active participants in the learning process.

# Acknowledgment

The Brownsville Independent School District gratefully acknowledges the contributions given by the Science teachers who participated in the development of this secondary Science curriculum framework. Science teachers from the following campuses assisted in the development of the framework:

- ❖ Hanna High School
- ❖ Lopez High School
- ❖ Pace High School
- ❖ Porter High School
- ❖ Rivera High School
- ❖ Lincoln Park School
- ❖ Besteiro Middle School
- ❖ Cummings Middle School
- ❖ Faulk Middle School
- ❖ Garcia Middle School
- ❖ Lucio Middle School
- ❖ Oliveira Middle School
- ❖ Perkins Middle School
- ❖ Stell Middle School
- ❖ Stillman Middle School
- ❖ Vela Middle School
- ❖ BUSP Secondary Science Mentors
- ❖ Secondary Science Curriculum Specialist

# Introduction

Texas Legislation requires that all Texas school districts develop, implement, and evaluate a comprehensive educational program aimed at student mastery of the Texas Essential Knowledge and Skills as defined in Chapter 112.

The purpose of this Secondary Science Curriculum Framework is to match learning experiences to the Texas Essential Knowledge and Skills and provide a sequence of objectives and lab activities that are also aligned, including the **40% lab requirement** for all High School Science courses. Brownsville ISD also requires the 40% lab minimum curriculum requirement for all Middle School Science courses.

In addition, this document includes sample activities and **required “EXEMPLAR” labs** to be taught in each course. EXEMPLAR labs are not intended to be the only labs taught in each course, but are provided to ensure consistency in high-quality instruction throughout the district. They should further serve to avoid overemphasis in one area while neglecting another, and thus, focus on student needs.

**Pre-AP** accommodations are indicated throughout the document, either as additional TEKS added to the course to meet the needs of the Pre-AP course sequence, or emphasized TEKS that need to be taught with added depth to the Pre-AP student in order to prepare them for the AP or Dual Enrollment course. Adaptations for other special populations will be made as needed, but the basic curriculum is the same for all students.

The textbook provided by the state is a resource for teaching the course, not the curriculum. Although the textbook “covers” all TEKS for the course, it does not necessarily provide instructional support for teaching the TEKS to the level of depth necessary to fulfill the TEKS intention. Therefore, it is highly recommended that teachers use a variety of additional resources from multiple sources in order to meet the TEKS requirements. Some of these resources may include, but are not limited to required Exemplar Labs, FOSS kits (which should be taught in their entirety as a unit), TEXTEAMS activities, Calculator Based Labs, Snapshot Activities and Vistas provided through the Charles A. Dana Center Science Toolkit.

This curriculum framework is primarily a working document that prescribes what is to be taught in a given subject or area of study. It gives both structure and direction to the educational program. As a formal document, it is an official statement of the curriculum and a teacher’s guide to instruction.

## Student Participation in TEKS-Based Inquiry and the BISD Science Fairs

Research, inquiry and invention are essential skills successful students must develop as they grow academically. Students must be able to discuss and evaluate social, technological and scientific issues evident today and trends influencing the future. A challenge for educators is to exploit the natural curiosity all students possess. Allowing time, opportunity and support during school hours for student-based inquiry permits learners to expose their misconceptions and pursue the “why” questions they have. Students should plan investigations and conduct research that can help them test their ideas, interpret differing points of view and justify consequent discoveries. Students are much more likely to internalize and remember concepts learned if they are actively involved with them, rather than passively observing them take place.

TEKS-based investigations enable students to effectively learn and use content-area concepts and skills. Through these types of direct investigations students are able to “maximize their ability to make sense of the world and to learn more about it.” (*Science for All Americans*) Therefore, it is a BISD requirement that all students participate in a research-based inquiry project at the sixth, eighth, and ninth grades. Participation at other grades or courses is highly recommended since successful research projects take two to four years. When students are engaged in research-based inquiry, they are involved in using a rich variety of primary and secondary source materials and the Science Process Skills as required by law in the Science TEKS.

A successful classroom science investigation may be developed into a research-based inquiry project and entered in the **Science Fair**. Students who choose to enter the fair will be able to create investigations from among fifteen different categories. The Science Fair will be held annually in the fall, allowing teachers and students to prepare for one science competition per year following the rules of the Intel International Science and Engineering Fair, ([www.sciserv.org/isef](http://www.sciserv.org/isef)). All students will have the opportunity to complete an original investigation. Individual campuses, teachers and students will be able to choose which projects to enter in the Science and Engineering Fair.

## SECONDARY SCIENCE INTEGRATED PHYSICS & CHEMISTRY SCOPE AND SEQUENCE

<b>Three-Week Units and Chapters</b>	<b>Exemplar Lab(s)* and Unit Content</b>	<b>Concepts TEKS</b>	<b>Processes TEKS</b>
<b>1<sup>st</sup> Six Weeks</b>  Force & Motion Newton's Laws Work and Energy Chapters 1-3, & 5	"Investigations and Experiments" "Position and Time" "Acceleration" "Force, Mass, and Acceleration" "Energy Conservation", <i>Science Project</i>	4 A, B, C, D 6A	1 A, B 2 A, B, C, D 3 A, B, C, D, E
<b>2<sup>nd</sup> Six Weeks</b>  Machines and Mechanical Advantage Electricity and Magnetism Waves Chapters 4, 6-10, & 12	"Forces in Machines" "Ohm's Law" "Work, Power, and Energy" "Waves" <i>Science Project</i>	4 A, C, D, 5 A, B, 6 C, D, E, F, G, 8E	1 A, B 2 A, B, C, D 3 A, B, C, D, E
<b>3<sup>rd</sup> Six Weeks</b>  Sound and Waves Light and Optics Chapters 13 -15	"Music", "Optical Technology" <i>Science Project</i>	5 A, B, C, D	1 A, B 2 A, B, C, D 3 A, B, C, D, E
<b>4<sup>th</sup> Six Weeks</b>  Properties of Matter Chapters 16 – 18	"Density of Fluids", "Viscosity of Fluids"	7 A, B, C, D, E	1 A, B 2 A, B, C, D 3 A, B, C, D, E
<b>5<sup>th</sup> Six Weeks</b>  Changes in Matter Water and Solutions Heating and Cooling Chapters 19,21,22,25,28	"Chemical Changes", "Conservation of Mass", "Specific Heat"	6 H, 7 D, C, 8 A, C, E, 9 A, B, D, E	1 A, B 2 A, B, C, D 3 A, B, C, D, E
<b>6<sup>th</sup> Six Weeks</b>  Changes in Matter Water and Solutions Heating and Cooling Chapters 19,21,22,25,28	"What is Acid Rain?", "What is pH?"	6H, 7 D, 8 A, B, D, E 9 B, C, D, E	1 A, B 2 A, B, C, D 3 A, B, C, D, E

\*Required Lab as part of 40% TEKS Lab/Field Requirement

# Integrated Physics & Chemistry

# National Science Education Content Standards For Grades 5-8

<b>Content Standard</b>	
A: Science As Inquiry	Abilities to do scientific inquiry Understandings about scientific inquiry
B: Physical Science	Properties and changes of properties in matter Motions and forces Transfer of energy
C: Life Science	Structure and function in living systems Reproduction and heredity Regulation and Behavior Populations and ecosystems Diversity and adaptations of organisms
D: Earth and Space Science	Structure of the earth system Earth's history Earth in the solar system
E: Science and Technology	Abilities of technological design Understandings about science and technology
F: Science in Personal and Social Perspectives	Personal health Populations, resources, and environments Natural hazards Risks and benefits Science and technology in society
G: History and Nature of Science	Science as a human endeavor Nature of science History of science

# National Science Education Content Standards for Grades 9 - 12

<b>Content Standard</b>	
A: Science As Inquiry	Abilities to do scientific inquiry Understandings about scientific inquiry
B: Physical Science	Structure of atoms Structure and properties of matter Chemical reactions Motions and forces Conservation of energy and increase in disorder Interactions of energy and matter
C: Life Science	The cell Molecular basis of heredity Biological evolution Interdependence of organisms Matter, energy, and organization in living systems Behavior of organisms
D: Earth and Space Science	Energy in the earth system Geochemical cycles Origin and evolution of the earth system Origin and evolution of the universe
E: Science and Technology	Abilities of technological design Understandings about science and technology
F: Science in Personal and Social Perspectives	Personal and community health Population growth Natural resources Environmental quality Natural and human-induced hazards Science and technology in local, national, and global challenges
G: History and Nature of Science	Science as a human endeavor Nature of scientific knowledge Historical perspectives
