

# *Mission Statement*

STAMP pledges to provide a Science, Technology, Architecture and Medical Professions High School recognized by its formation of students seeking careers in health care, science, technology, architecture, mathematics and engineering through a challenging curriculum that exposes them to critical thinking, field studies, hand-on projects and research. At STAMP, our passion is to shape individuals to become leaders in their chosen fields, dedicated to public service, social responsibility, and to encourage all students to pursue their passion, as we pursue ours.
